

MRLn: How to Set Up A User Account

Some of MRLn's more advanced features will require you to create your own account. These features include sending a request to the library for an item you'd like to check out, saving searches, and more.

In the process of setting up your account, you will create a username and a password.

Here are a couple of things to remember about these:

- Library staff will not know your **password** or have access to it at all. We can help with resetting your password, but you will have to create your own password after a reset. This is a security feature which will better protect you while using MRLn.
- Your **User ID** is simply your email address. You must use your email address as that ties into your account which allows use to check materials out to you.

1) To register, start by CLICKING on the "Sign In" button at the top right of the screen.

2) In the "Sign In" box that pops up, click on Register Now and you will fill out the registration form.
